Industrial Storage Bin Solutions

BULK MATERIAL STORAGE BIN DESIGN MAXIMIZES SPACE

No matter what your industry, you can feel confident in the success of your next bulk material storage project, thanks to Abel's decades-long experience in proven storage system design.

At Abel, we build our steel industrial storage bins in square or rectangle arrangements, not round. This design allows our bins to be easily clustered in virtually any arrangement, ideal for maximizing your facility's space.

You can choose from three unique solutions:

- ✓ SMOOTH WALL BULK STORAGE BINS
- ✓ STANDARD WALL BULK STORAGE BINS
- ✓ CORRUGATED WALL BULK STORAGE BINS

Built to last by an experienced manufacturer

Investing in new industrial storage bins is no small endeavor. When choosing a vendor, you need to feel confident you are spending money with a company that will come through for you. Because Abel has been building bulk storage systems longer than anyone else in the industry, you can feel confident our systems will be built strong and durable, giving you no problems for decades to come.

ASK ABOUT OUR STORAGE SYSTEMS

No matter which square steel bolted bins you choose, you can rest assured our engineering and design team will develop bins built durably for long-lasting performance. You won't find a bin system of similar quality at a lower cost.

For more details and design specifications, see our brochure.
